

AYUSH MISHRA

DATA ENGINEER | SQL | PYTHON | PYSPARK | AWS | ETL
Noida | +91-7905802515 | ayushmishra750980@gmail.com | [Github](#) | [LinkedIn](#)

SUMMARY

Data Engineer with **3.5+ years of experience** delivering enterprise-scale ETL, data migration, and distributed processing solutions. Proven track record of building scalable data pipelines, improving data quality, and driving large-volume data transformation initiatives across cloud-based environments while ensuring reliability, performance, and operational efficiency.

SKILLS

Programming: Python, SQL, Java

Data Analysis: Pandas, NumPy, Advanced Excel, EDA

Visualisation & BI: Tableau

Big Data & Cloud: PySpark, ETL, Distributed Data Processing, AWS (S3, Glue, Step Functions), BigQuery

Tools: Git, JIRA

EXPERIENCE

Data Engineer – Cognizant Technology Solutions *Dec 2022 - Present*

- Processed and transformed **5M+ records** using PySpark and SQL in distributed data processing environments, improving data quality and reducing manual effort by **40%**..
- Led 2+ end-to-end data migration and validation initiatives, designing ETL pipelines using AWS Glue and PySpark, achieving **100% data accuracy** during production.
- Built and optimised distributed ETL pipelines using PySpark, Python and AWS (S3, Glue, Step Functions, Lambda), improving processing efficiency by **~30%**
- Performed data preparation, transformation, and exploratory data analysis (EDA), and developed validation frameworks to ensure data accuracy, quality, and compliance with business rules.
- Collaborated with cross-functional teams to translate business requirements into scalable data processing and reporting solutions.

PROJECTS

Revenue Optimisation & Experimentation Analysis System

- Analysed **1M+ customer records** to identify revenue leakage, behaviour trends, and growth opportunities.
- Extracted, transformed, and analysed large datasets using SQL and Python to create structured data models for reporting and decision-making.
- Performed A/B testing experiments that improved campaign conversion analysis accuracy by **25%**..
- Developed Tableau dashboards and Excel reports to track KPIs such as revenue growth, conversion rate, and customer retention.

Tech Stack: SQL, Python, Pandas, NumPy, Advanced Excel, Tableau

Operations & Supply Chain Performance Analytics

- Analysed logistics and order fulfilment data to evaluate operational efficiency and identify delivery bottlenecks.
- Performed SQL-based data extraction and transformation for shipment and order processing analysis.
- Identified process inefficiencies contributing to **15–20% delivery delays** through exploratory data analysis.
- Automated reporting workflows using Python and Excel to streamline operational reporting.

Tech Stack: SQL, Tableau, Advanced Excel, Python

EDUCATION

Jaypee University of Engineering & Technology | 2022

Bachelor of Technology in Computer Science

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner - Amazon
- Problem Solving (Intermediate) - HackerRank
- Data Science and Machine Learning - Scaler by InterviewBit
- Python for Data Science and Machine Learning Bootcamp - Udemy
- PySpark and Python for big data - Udemy
